

The Green Consulting Firm audit and certification program has been created and developed by the Green Business League a National third party independent program with the largest number of Green Consultants™ in the Nation.

Our program was specifically designed for organizations, preschools, schools and communities that have made a commitment to “going green” but who need help in taking practical steps towards that goal.

Using education as our primary tool, we will provide an individualized path toward Green Certification.

Membership and Participation

Training and Certification are accomplished for a charge that is generally designed to be cost effective “Zero Cost Consulting” our goal is to enable our clients to recover consulting cost in a relatively short period of time.

Green Business Certified status is not granted without some level of honest participation in the Greening of the business in question. We believe that Going Green is not a one time achievement, but a progressive process that will go on year after year.

Therefore, our program is a monthly step-by-step process (Green Management) that allows any organization or community to select environmental options that best fit your business and budget.

Green Business Certified	Silver	100 Points
Green Business Certified	Gold.....	200 Points
Green Business Certified	Platinum.....	300 Points
Green Business Certified	Titanium.....	500 Points

Points are earned for any sustainable changes and improvements made by your organization and or community. After completing phase one of the certification program your Green Consultant™ will continue to monitor (bi-annually) your progress and will audit your business practices. Points will carry from year to year as long as the company continues reinforcing green practices. This allows your organization to progressively earn a higher level of certification.

Disclosure: This is not a LEED program; certainly, the ideas fostered in the Green Business program are complimentary to the LEED certification.

Our third party Audit-Certification Point System may be implemented by any Industry, Organization, School, Association, Foundation and/or Local Government Agency interested in promoting greening programs for all types of businesses and communities.

As a Green client your company gains unrestricted access to our panel of green environmental consultants who will advise you right from the word "go" to "green". Our Firm will develop a customized strategic green plan for your organization needs and find ways to reduce as well as certified you as a genuine green business.

Natalie Calleja, President
Certified Green Consultant™ & Sustainable Coach
